

NEWSLETTER APRIL - JUN 2023

Water and Sanitation Services Peshawar

Chief Executive Officer's Message

I am thrilled to share that WSSP has made considerable achievements, improving services delivery system and implementing environment-friendly projects. Among these projects are reconstruction of drainage network, replacement and expansion of water supply network. But the project that we take pride is the construction of a first of its kind decentralized wastewater treatment system that has started treating wastewater which then used for irrigating Wazirbagh Park – thanks to UNICEF for its financial assistance.

A wastewater treatment plant plays a vital role in ensuring that the water we use every day is clean and safe. Without it, untreated wastewater could contain harmful pollutants that can contaminate our waterways and pose a serious risk to public health.

WSSP is well-aware of wastewater harmful effects. The system is essential for protecting the environment and our freshwater resources that will lead us towards a sustainable development. By removing harmful pollutants from wastewater, we can prevent damage to aquatic ecosystems and help to conserve our natural resources. The system is being run and maintained by a team of engineers.

The treated wastewater is being recycled and reused for non-potable purposes, such as irrigation of Wazirbagh park at a reduced cost.

This is smaller system, but definitely a significant one and days are not far when will would have a larger system that will treat wastewater of the whole city.

As a responsible member of the community, WSSP's management considers it its duty to prioritize the health and well-being of our citizens and protect our environment. I strongly believe that investing in a wastewater treatment plant is a necessary step towards achieving sustainable development goals.

Revitalizing the Kabul River Canal: A Commitment to Peshawar's Environment

WSSP Takes Action to Clean Kabul River Canal and Combat Pollution

In alignment with the Peshawar High Court's directives, WSSP initiates a cleaning campaign for the Yaka Toot canal. Trash bins strategically placed from Berry Bagh to the cemetery area aim to curb littering. WSSP CEO, Dr. Hassan Nasir, emphasizes the community's role in maintaining a cleaner and greener Peshawar.

Joint Efforts for a cleaner Canal: WSSP collaborates with Irrigation Department

WSSP and Irrigation Department Team Up to Remove Filth from Yaka Toot Canal
WSSP and the Irrigation Department join forces to clean the canal and its surroundings. The collaborative effort involves the deployment of trollies and an excavator to streamline the cleaning process. An extensive awareness campaign targets residents, shopkeepers, schools, and clerics to promote responsible waste disposal.

DEWATS:

Transforming Wastewater into a Resource

WSSP Introduces Decentralized Wastewater Treatment System (DEWATS) for Sustainable Water Management

WSSP pioneers a decentralized wastewater treatment system (DEWATS) to address water contamination issues. The project, inaugurated by Caretaker Minister Sawal Nazir, signifies a significant step in treating harmful toxins and chemicals in sewage water. The system promotes safe water reuse and contributes to environmental conservation.

Empowering Communities: Minister Advocates for Clean Water Resources

Minister Sawal Nazir Commends DEWATS Project for Preserving Water Quality

Caretaker Minister for LGE&RDD, Advocate Sawal Nazir, expresses gratitude for UNICEF's support and highlights the crucial role of projects like DEWATS in preserving clean drinking water. He underscores the government's commitment to tackling water pollution, ensuring a healthy environment, and acknowledges UNICEF's continuous assistance.

University Road Cleanup: WSSP's 10-Day Clean and Green Peshawar Campaign

WSSP Launches 10-Day Awareness Drive on University Road for a Cleaner Peshawar

As part of the Clean and Green Peshawar initiative, WSSP conducts an awareness drive on University Road, engaging diverse communities. Prominent figures such as Chairman Khalid Ayub and Zarghun Movement's Abdul Wali encourage citizens to actively participate in maintaining cleanliness, emphasizing the moral and legal aspects of the initiative.

Expanding Clean Water Access in Urban Areas: WSSP and IDEA Collaborate

WSSP and IDEA Join Hands for One-Year Agreement to Ensure Clean Drinking Water Access
In a significant partnership, Water and Sanitation Services Peshawar (WSSP) and Initiative Development and Empowerment Access (IDEA) sign a one-year agreement to enhance access to clean drinking water for underprivileged communities in urban areas. The collaboration aims to implement projects that improve community outreach and effectively address water filtration needs.

Eidul Azha Cleanliness Operation: WSSP's Remarkable Success

WSSP Concludes Three-Day Eidul Azha Operation, Collects 11,000 Tons of Waste
Water and Sanitation Services Peshawar (WSSP) successfully concludes its three-day cleanliness operation during Eidul Azha, receiving accolades from various sectors. The initiative, inaugurated by Chief Executive Officer Dr. Hassan Nasir, witnessed the collection of over 11,000 tons of waste from 65 urban union councils. The dedicated efforts of 3,259 sanitary staff and 683 vehicles contributed to the operation's success.

Community Collaboration for Eidul Azha Operation

Community Appreciation and Collaboration Mark Eidul Azha Cleanliness Operation
Special Assistant to Chief Minister Mahar Illahi, Deputy Commissioner Saniya Safi, and CEO WSSP Dr. Hassan Nasir appreciate the dedication of sanitary workers during the Eidul Azha operation. The community plays an active role in supporting the initiative, and social media platforms are flooded with words of appreciation. The awareness drive, distribution of biodegradable bags, and collaboration with religious leaders contribute to a successful and cleaner Eidul Azha.

Eidul Azha

Effective Waste Disposal: WSSP's Strategic Approach

WSSP Implements Strategic Plan for Eidul Azha Waste Disposal

A meticulous plan is executed to handle waste disposal during Eidul Azha. WSSP cancels leaves for management and operation staff, ensuring a robust team of 3,259 sanitary workers, 683 vehicles, and various equipment. An awareness drive educates the community on proper waste disposal, and collaboration with ulema enhances public understanding of the importance of cleanliness.

Safe Waste Disposal at Shamshato Dumping Site

WSSP Ensures Safe Waste Disposal with Dug Pit at Shamshato Dumping Site

In preparation for the Eidul Azha operation, WSSP digs a 200-foot long and 90-foot deep pit at the Shamshato dumping site for safe waste disposal. The operation includes thorough patrolling of city roads to clean waste fallen on the streets. The initiative demonstrates WSSP's commitment to efficient waste management and community welfare.
